

UFO Battle in the Desert

by David Michael, info@glentivar.org

UFO Assault

In the early morning of the 12 of May 2017, I found myself in a desert. There were alien UFO saucer type craft all over the place shooting laser type weapons upon a human army on the ground who had a far inferior technology. I watched for a while as I observed the humans being decimated without any way to defend themselves. I was feeling a sense of sorrow for the defenseless humans and then was compelled to engage with selected UFO craft that were directly flying over head. I would raise my right arm up with palm open to the UFO crafts and then speak a few words in a language I did not understand and then watch the UFO craft explode in mid air and fall to the ground in shattered pieces. This occurred many times over and over again. I lost count.

Refuge for Humans

I continued to do this as the air assault continued to focus its armada of ships on me and away from the other humans. As they kept coming in being destroyed and then falling to the ground, they soon stopped flying overhead and distanced themselves from me. This created a safe place around where I was standing for the besieged humans to escape and find refuge.

Thoughts

This is a reality that is both present in the spiritual realm and future in the physical realm. The hostile UFO ships are here now and are mostly working in a stealth or cloaked mode. Soon the rules of engagement will change with the UFO ships being very visible for all to see as they seek to destroy all who do not comply with their agenda for the earth in the enslavement of humans.

It is very evident that the common technologies available to humans will be no match for the alien technologies of their armada. Mankind will be easily destroyed with weapons that seem to be unlimited in power and speed in neutralizing their targets. Only the faithful will have the power to disable these craft that seem to be both physical and ethereal in composition. This is a time when the spiritual world and the physical world are overlapping where both coexist in the same dimension of time and space.

Language of Creation

The language spoken in this experience is the language of angels that was used for original creation. It is the language that resonates perfectly with nature in being able to turn energy into matter and matter back into energy. It is the Word of YHWH that holds all matter together as spoken in The Beginning when all was created. It is the Word of YHWH that can loosen the bonds of molecular matter where it then falls apart with explosive force.
